SECTION 4 – FIRST AID MEAS	SURES
Contact with eyes:	Flush eyes immediately with plenty of water for 15 minutes and seek medical advice immediately.
Skin contact:	Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water. If irritation develops, seek medical advice.
Inhalation:	Remove to fresh air. If breathing is stopped, give artificial respiration. If breathing is difficult, give oxygen. Seek medical advice.
Ingestion:	Rinse mouth with water. Give 1 or 2 glasses of water or milk to dilute. Do not induce vomiting. Seek medical advice immediately.

**SECTION 6 - ACCIDENTAL RELEASE MEASURES** 

Personal preca	utions:	Keep away from heat, sparks and open flame. Provide sufficient ventilation, use explosion-proof exhaust ventilation equipment or wear suitable respiratory protective equipment. Prevent contact with skin or eyes (see section 8).
Environmental	Precautions:	Prevent product or liquids contaminated with product from entering sewers, drains, soil or open water course.
Methods for C	leaning up:	Clean up with sand or other inert absorbent material. Transfer to a closable steel vessel.
Materials not t	to be used for clean up:	Aluminium or plastic containers
SECTION 7-	HANDLING AND STORAGE	
Handling:	Avoid breathing of	vapor, avoid contact with eyes, skin and clothing. Keep away from ignition sources, use only electrically grounded handling
	equipment and ens	sure adequate ventilation/fume exhaust hoods. Do not eat, drink or smoke while handling.
Storage:	Store in ventilated	room or shade below 33°C (90°F) and away from direct sunlight. Keep away from ignition sources and incompatible materials:
	caustics, ammonia,	, inorganic acids, chlorinated compounds, strong oxidizers and isocyanates. Follow all precautionary information on container
	label, product bulle	etins and solvent cementing literature.

	Cyclohexanone	20 ppm	50 ppm	50 ppm	N/E	N/E	25 ppm	N/E	N/E
Engineering Controls:	Use local exhaust as ne	eeded.							

Monitoring: Maintain breathing zone airborne concentrations below exposure limits.

### Personal Protective Equipment (PPE):

Eye Protection:Avoid contact with eyes, wear splash-proof chemical goggles, face shield, safety glasses (spectacles) with brow guards and side shields,<br/>etc. as may be appropriate for the exposure.

Skin Protection: Prevent contact with the skin as much as possible. Butyl rubber gloves should be used for frequent immersion. Use of solvent-resistant gloves or solvent-resistant barrier cream should provide adequate protection when normal adhesive application practices and procedures are used for making structural bonds.

Respiratory Protection:

Prevent inhalation of the solvents. Use in a well-ventilated room. Open doors and/or windows to ensure airflow and air changes. Use local exhaust ventilation to remove airborne contaminants from employee breathing zone and to keep contaminants below levels listed above. With normal use, the Exposure Limit Value will not usually be reached. When limits approached, use respiratory protection equipment.
